PROFESSIONAL SUMMARY

Motivated Java Developer with 2.5 years of hands-on experience in designing, developing, and maintaining Java-based applications. Proficient in core Java, Spring Boot, RESTful APIs, and relational databases. Strong problem-solving skills with a passion for building efficient and scalable software solutions. Experienced in collaborating in Agile teams and contributing to open-source-inspired projects.

TECHNICAL SKILLS

Languages: Java (Core, OOP), JavaScript, HTML, CSS, SQL
Frameworks / Tools: Spring Boot, Hibernate, RESTful Web Services, JSP, Servlets
Databases: MySQL, PostgreSQL, Oracle DB
Other Skills: Git, GitHub, Maven, Gradle, JIRA, Agile Methodology, Unit Testing (JUnit)

PROFESSIONAL EXPERIENCE

ActiveState, Canada| Java Developer **Jan 2025 - Present**

Responsibilities:

- Developed backend components and services for internal tools and platform automation using Java and Spring Boot.
- Designed and implemented RESTful APIs for integration with ActiveState platform services.
- Maintained and optimized relational databases (MySQL and PostgreSQL) to support application performance.
- Assisted in automating build and deployment processes using Maven and Git workflows.
- Collaborated closely with cross-functional teams including DevOps and QA to ensure timely delivery of features.
- Participated in Agile Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives.
- Conducted unit testing using JUnit and contributed to code reviews to maintain code quality standards.
- Supported troubleshooting and debugging of production issues for ActiveState platform users.

Key Achievements:

- Contributed to automating repetitive platform tasks, improving team productivity by 10%.
- Successfully delivered backend modules for platform enhancements ahead of deadlines.

Amazon, India| Jr Java Developer **Jan 2022 – Mar 2023**

Responsibilities:

- Developed and maintained Java-based backend modules using Java 8+, assisting in building core application features.
- Implemented and tested RESTful APIs under the guidance of senior developers.
- Assisted in database interactions using SQL/MySQL/PostgreSQL for data retrieval and basic CRUD operations.
- Wrote unit tests using JUnit and Mockito to ensure code quality and functionality.
- Debugged minor issues and participated in resolving production bugs with guidance from senior team members.
- Participated in code reviews and followed coding standards and best practices.
- Collaborated with cross-functional teams including QA engineers, product managers, and senior developers in Agile sprints.
- Documented code, workflows, and technical specifications for reference and knowledge sharing.

Key Achievements:

- Successfully delivered the first backend module on time, integrated into Amazon's internal tool, improving process efficiency.
- Reduced bug rate in assigned modules by 15% through diligent unit testing and participation in code reviews.
- Learned and independently implemented RESTful API integration and database operations within the first 3 months.

PROJECTS:

Hotel Room Booking Application (Java | MySQL) – [Github link]
May 2023 – December 2024

- Designed and deployed a database-driven booking system using **Java** and **MySQL**, implementing validation and exception handling mechanisms that reduced runtime errors by 30%.

- Monitored application performance and triaged user-reported issues to identify and resolve functional and data inconsistencies.
- Provided operational support during testing and go-live phases by validating data integrity and confirming system stability.

E-Commerce Application (Java Spring Boot | PostgreSQL | Power BI) – LegoSet

- Monitored backend data processes and logged operational errors, creating structured RCA documentation to ensure system stability during deployment.
- Participated in simulated change management processes, managing code updates and post-release testing to verify data integrity and user access accuracy.
- Collaborated in Agile sprints to identify bugs, manage version control in Git, and maintain system availability during test cycles.
- Authored knowledge base entries for common deployment and integration issues to enhance support documentation.

EDUCATION:

Diploma in Computer Programming and Analysis – Seneca College, Canada| GPA 3.3 | Dec 2024

CERTIFICATION:

Oracle Certified Associate (OCA) Java SE
Responsive Web design - freeCodeCamp
Spring VMware certified professional
Git & GitHub fundamentals - GitHub learning lab
Microsoft Azure Fundamentals
